British accented narrator, check. Unexplained circumstances, check. This is pretty cool but the puzzles at the start are a little tedious and the frame rates were not amazing. Check it out. <https://youtu.be/13RXb-LGNcc>. I don't want to sound like a baby, but.what is the point of stating "Partial Controller Support" when you cannot even use the controller to do anything but walk? That's like having a car with no steering wheel. With the aforementioned paragraph in mind, I admit the jumping/platforming parts in this game with keyboard/mouse is a tad frustrating. The story/concept is great, but I may not ever play it again because of the jumping/platformer frustration, which is unfortunate because I just want to get past a certain part and cant (ok now i really sound like a baby, waaaaaah!).
